WTLCIC2015

Chico to Red Bluff including the areas near Artois, Ord Bend & Nord

Weather Tools Station Map

Today's Headlines	Zone 1	Tue, 05/10/16

We need to start off by looking at the Zone forecast graphs below since the model is now suggesting a significant round of precipitation beginning Fri, 5/20. While it is too far out to have any real confidence, the fact that it is a multi-day event coupled with the model's recent performance should spur us to a fairly high degree of awareness. Back to today, we are warming up and should be under a moderate north breeze today; see Zone forecast tables for details. Our wind should turn around to southerly by mid-afternoon tomorrow (save Zone 4), but our temperatures should remain quite warm. It appears that the warmth will begin to disappear Friday, 5/13 with the arrival of fairly strong onshore flow for all Zones (S flow direction for Zones 1-3 and WNW flow direction for Zone 4).

12AM to 12AM	Mon, 05/09/16				% Normal; 7/1 - Today	% Normal; 7/1 - 4/1
